This program offers students the opportunity to study all aspects of Visual Effects Animation. In these courses students acquire comprehensive skills in computer-generated 2D & 3D graphics, animation & VFX compositing, using the industry’s most widely used software production, such as Autodesk Maya, Autodesk Mudbox, Adobe After Effect, and Adobe Premiere.

SAE provides an understanding of the system and equipment used for creating animation & visual effect compositing and the practical experience in production techniques and design concepts. The degree broadens the learning experience beyond the purely vocational type training, by including a wider knowledge base and research-based educational experience. This degree is taught and administered by SAE Indonesia and validated by Middlesex University, London.

CAREER OPTIONS:
VFX Director, Art Director, VFX Supervisor, CG Supervisor, Technical Director, Rotoscoper, Lighting & Rendering, Character Modeler, Environment/Prop Modeler, Texture Artist, Character Animator, Character TD (Setup & Rigging), Character Design and Educator.

SAE Indonesia reserves the right to alter the course structure without prior notice
